Hazardous Weather

A Winter Weather Advisory is in effect along and north of a Comanche to Cleburne to Cooper line today. An upper level disturbance will move across the northwestern part of North Texas today bringing snow to the region. The heaviest snow is expected to occur along and northwest of a Cisco to Gainesville line where 2 to 4 inches of snow is expected. Farther south...areas along and north of a Comanche to Cleburne to Cooper are expected to receive up to 2 inches. The rest of the forecast area expected to receive an inch or less.

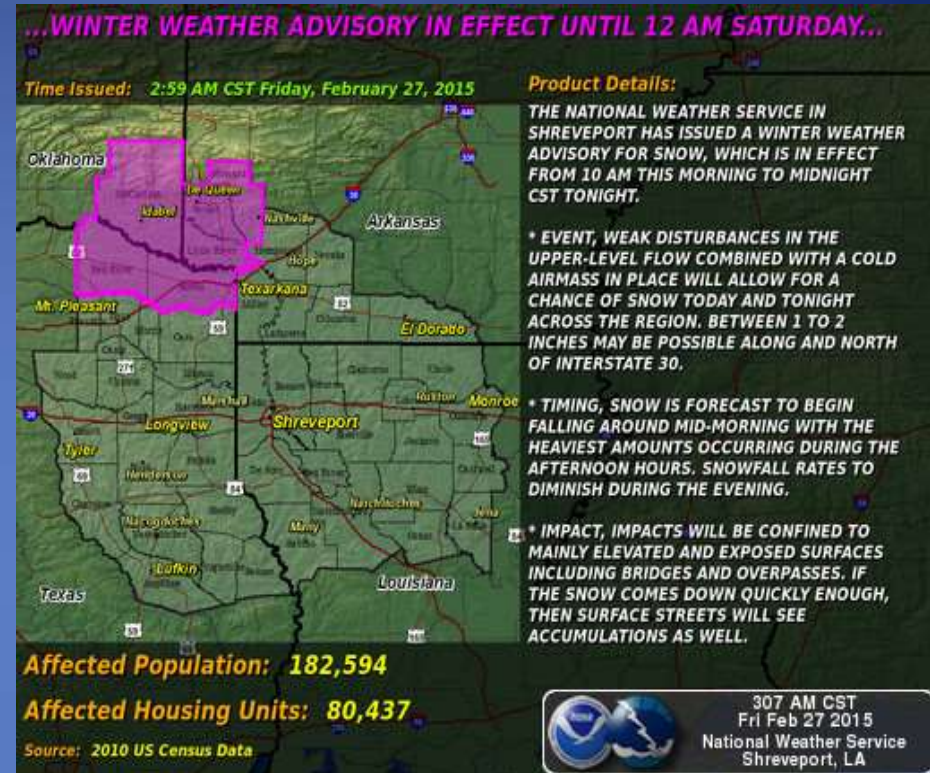

Winter Weather continues across West Texas and Southeast New Mexico. Areas within the Advisory can expect 2 to 4" of snow accumulation while south of the advisory areas could see around 1 to 2" of snow, accumulating snows ending early this morning south of Interstate 20.

Hazardous Weather

Snow accumulations will be possible today with the heaviest snow amounts expected across parts of southern OK and western north TX.

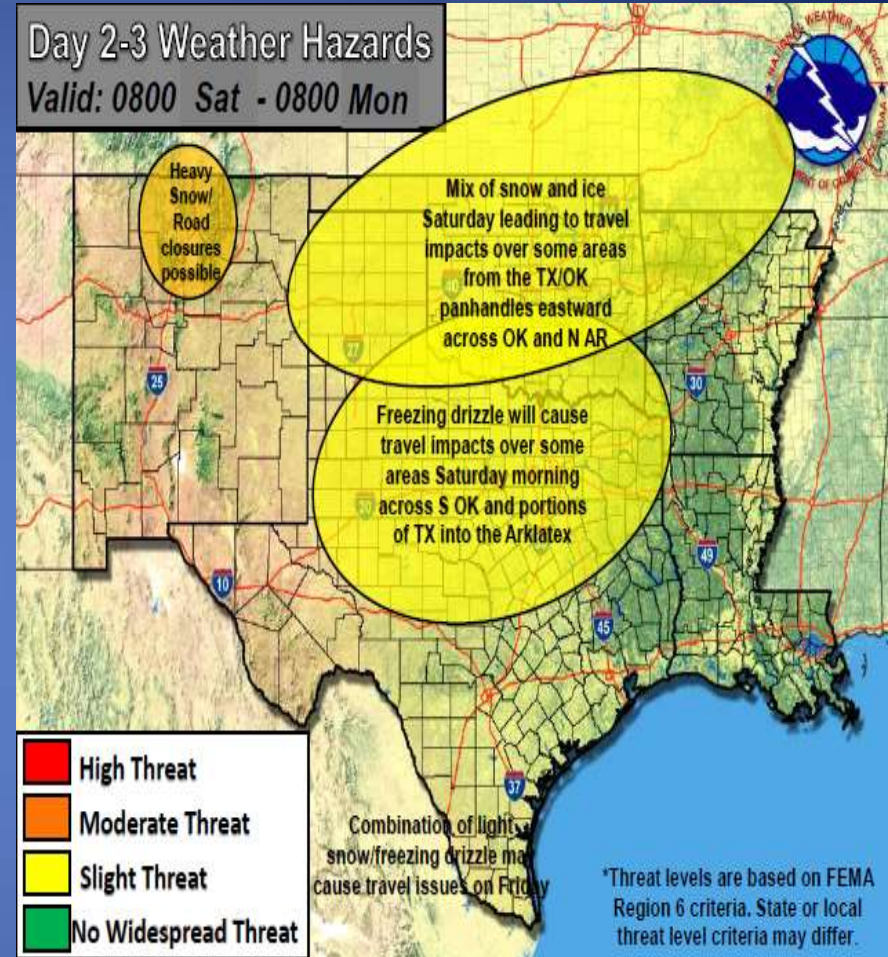

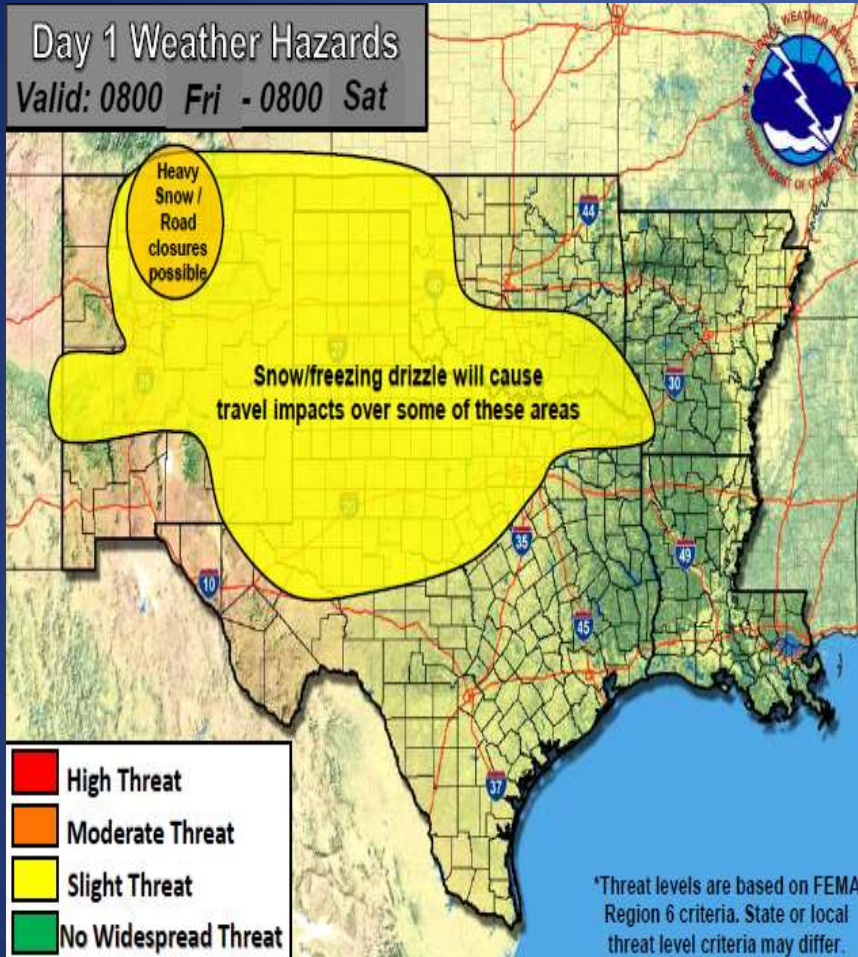

Hazardous Weather

Another upper level system will move across the area today, bringing another round of wintry precipitation, mainly in the form of snow, generally for areas north of a San Angelo to Brady line. Light freezing rain or freezing drizzle will then be possible Friday night across much of the area.

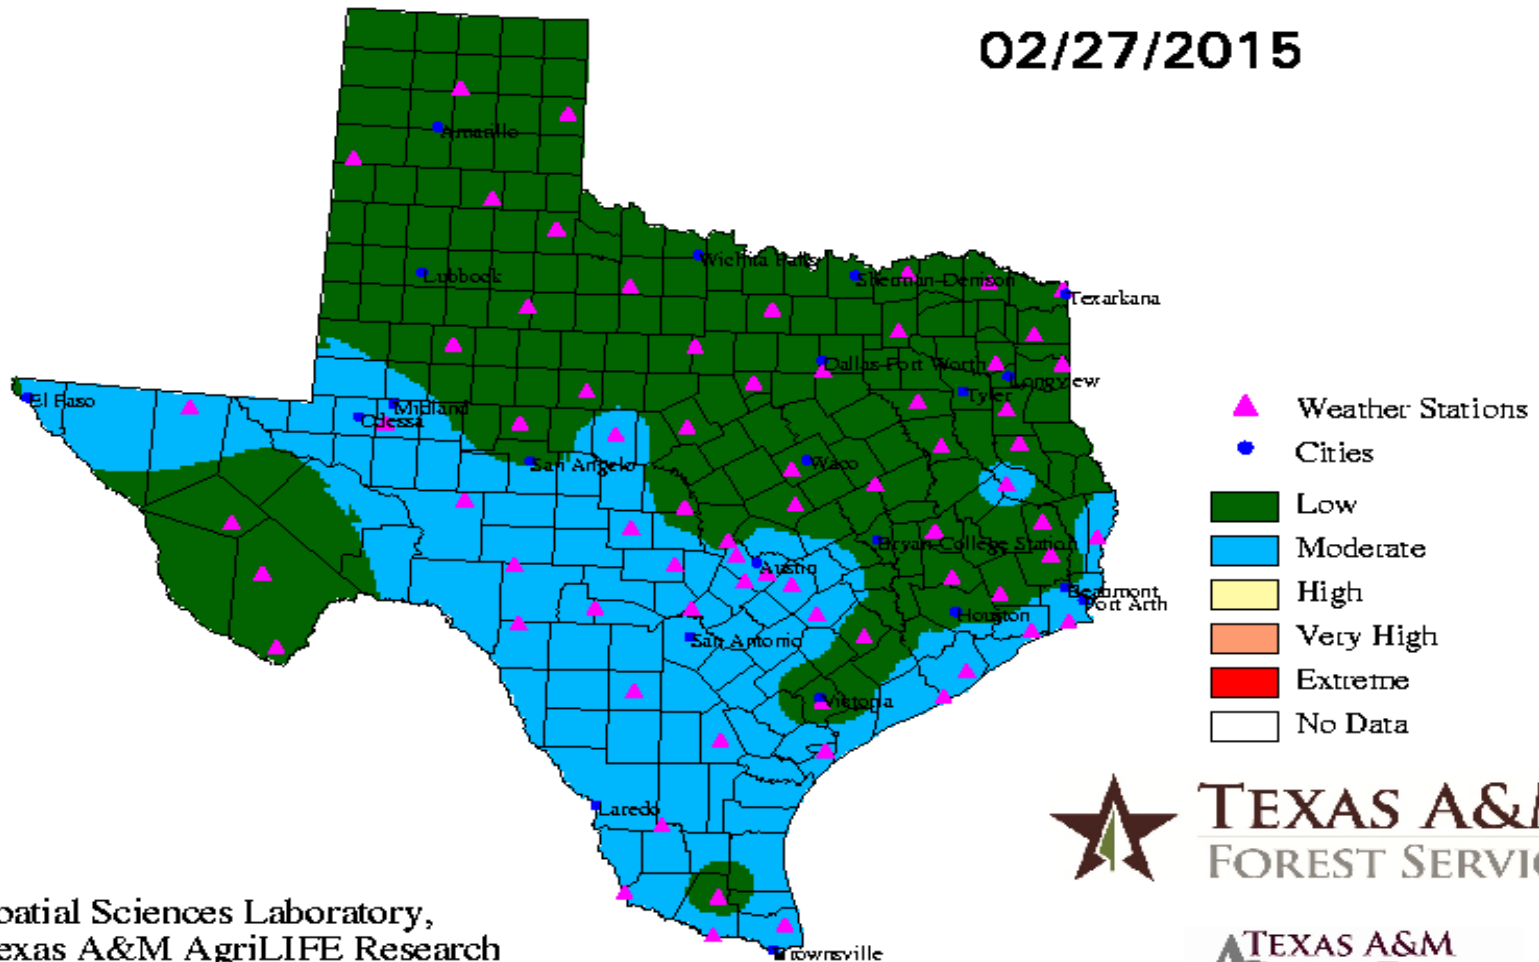

Hazardous Weather
